

Top 10 things I like about house/neighborhood:

- You can see the golf course from the patio and you can see hole 9 (the flag) from the kitchen window
- There is an indoor/outdoor dog kennel in the garage – with a door that you can keep open or closed
- Lots of storage between the space under the entry way, extra closet above coat closet in entry way and the large closets in the hallway
- Everything is on one level – no big staircases to go up or down
- Lots of area for displaying things – lots of space on the wall under the living room windows and above the fireplace and on the shelf next to the stairs (I put a fake Christmas tree there and nativity scene)
- Vaulted ceilings in living room – with the windows it really opens it up
- Open concept living/dining/entertaining – the space for the kitchen/dining area/living room flow together so nicely – it was great for having people over for dinner or a party or to watch football games
- Large patio – lots of room for a bonfire right by the house and patio dining furniture and patio relaxation (i.e. couch/chairs) furniture
- Heated garage stall – closest to the entry door so this is great for a workshop area or to keep an extra fridge or to park a car in the winter and have it heated, or to have an off season garage sale
- Lots of yard space for activities – a lot of room for a nice big garden, or room for kids to play soccer/football, etc... right in the yard and nice if you have a bigger dog that needs some room to move
