

Muddy Creek Ranch Wildlife

Muddy Creek Ranch has been hunted very little previously, and none in recent years, which, along with habitat management, has resulted in a thriving population of wildlife. Due to management and conservation, Muddy Creek is home to a plethora of white tail deer, bobcats, turkey, dove, quail, water fowl, raccoons, coyotes, hogs and a multitude of other varmints and creatures. The property also includes a natural flyway zone for migratory game birds.
